

6612

One-pass efficiency

X3

Model 6612 Bedder-Layer Combo covers big acreage, forming beds and applying plastic mulch in one pass. Typically used with drip tape, add applicators as needed, one or two lines per bed.

While the one-bed Model 4612 offers a wide range of adjustment for mulch width and bed spacing, 3-bed models offer application of 4-ft plastic mulch on 5 to 6-ft bed centers. 4-1/2-ft plastic on 5-1/2 to 6-ft centers and 5-ft plastic on 6-ft centers. Also configure the 6612 for 80" bed spacing. Tell us what you need. Toolbar frame width is made-to-order.

120 PTO HP may pull three beds but utilize a tractor closer 150 PTO HP for the tractor weight needed to lift a 3-point mounted combo loaded with plastic rolls and drip tape rolls. Newer tractors may have more hitch lift capacity but likely need weights for lifting and/or traction. As with any one-pass bed shaping, prepare soil with deep tillage for a ready-to-plant seedbed.

5 - 8" bed height

Adjustable bed top

Easy-start mulch rows
