4-row

**For deep placement below seedbed
Maximum 12" depth**

**PROVEN IN THE FIELD
SINCE 1996**

- 25 PTO-HP rating PER SHANK
- Category 2 hitch, quick-hitch compatible
- Double 4" square toolbars
- Combined ripper shank & guides w/ shear-bolt
- 20" Coulters w/ spring-cushion
- 5-bolt gauge wheels
- Single or double tape roll supports

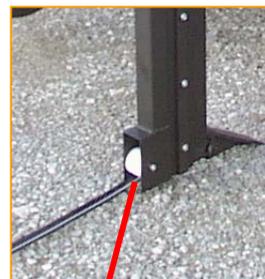

AUTOMATIC ROLL BRAKE

This on-off type belt brake allows roll to turn freely when the tractor goes and prevents free-wheeling when tractor slows or stops. Our state-of-the-art design is a big improvement over drag-style brakes.

ANTI-FLIP GUIDE

Deep placement shanks feature an anti-flip guide. In practice, flipping is rarely a problem. This simple device only ensures it.

ROLLERS REDUCE FRICTION

Drip line gently turns the corner on poly rollers to minimize friction and drag. Along with our automatic brake feature, tape unrolls without stretching.

EASY-LOAD

Applicators rotate to load tape rolls. In-line shank and roll spacing can be as close as 30"
