

To our valued customer,

Thank you for your interest. Our comprehensive line of equipment and know-how brings proven and progressive methods to the fresh-market and wholesale farm scene. Expect practical designs, versatile applications and rugged service with small or large-scale models.

Exceptional product knowledge and support - plus more

We care that equipment is matched to your tractor, your acreage or your budget. We can review farming practices so your new equipment takes you where you want to go. Our knowledge and experience with moisture control, tillage, raised beds, plastic management (including removal) and tractors in the specialty-crop culture enables us to help maximize equipment benefits. We want to you to be successful.

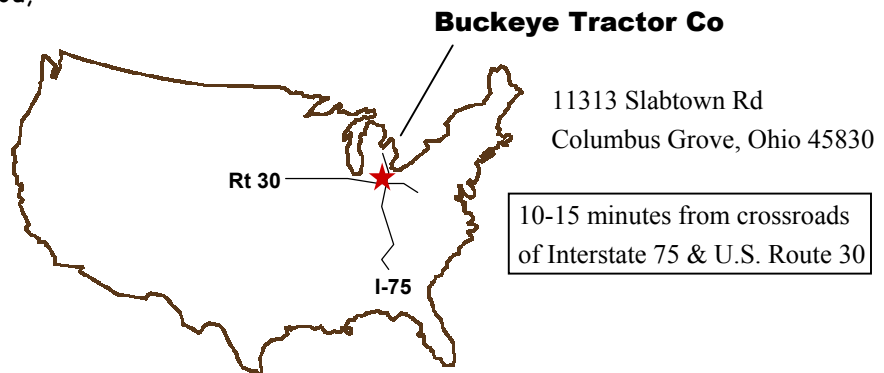

Ability to adapt to your needs

Our modular, bolt-together design allows quick adjustments and assembling machinery for your purposes. Many options and attachments are available. And our equipment can often change along with your system changes. We can customize with practical solutions and a "yes we can" attitude. Hungry for knowledge and wisdom and willing to work, man should be the master of machinery, not subject to it.

A big bang for the buck and a very high satisfaction rate

Price is often a primary factor in purchasing equipment. We are competitive - if not superior - in the effort to provide the most for the least. You can probably find *something* for a dollar less out of your pocket but you won't find something that will make you a dollar more in the field.

Looking forward to serve you,
Lynn Graham, Manager
