

Due to recent trucking changes, shipping charges are now listed as line items on our invoice. Give us accurate information about your shipping address, unloading capabilities and your accessibility when placing the order. We will notify you about the tracking number and local terminal phone number after order has been shipped.

All LTL motor truck shipments

Shipping charge - This is the basic shipping service based on space, weight and distance.

Fuel surcharge - Based on the price of fuel - a percentage of the shipping charges.

Packaging material fee - Covers boxes, crating, wraps, tape, etc

Fees for Canadian shipments - Export costs billed to us are passed on to you. Brokerage fees, tariffs, sales taxes, etc are paid on your end.

Optional charges - normally does not apply to dealers

Residential delivery fee - Applies to YOU - any farmer according to most freight companies.

Lift gate service fee - This requires a special delivery trailer and can be a substantial fee. The driver is required to move the freight to the rear of the trailer. The lift gate further lowers it to ground level. YOU must do the rest.

Limited access fee - Applied to any shipment that is unusually difficult to deliver. This is applied at driver discretion and can be substantial.

How to reduce freight costs

Pick shipment up at your local freight terminal.

Pick up order at the factory. For a small fee, you can arrange to have your machines fully set-up.

Arrange your own shipping. YOU make all arrangements and provide all paperwork.

Arrange for delivery to a commercial destination (dealer, etc.).

Give us accurate information. If any changes on the Bill of Lading are required after the order has left the factory, clerical fees will be charged by us and the freight company. A credit card will be required to pay these charges before shipment will be delivered.
