

Strawberry Special

Models 3361 and 5361 are specialized Disk Bedders, originally used with sensitive berry crops. These are designed to aggressively move more soil to build beds 10" or 12" high. Use in light and deep, easy-working soils without concern over bottom soil turning up on top. Be sure tractor drawbar clears beds this high.

These rugged disk gangs are also a better choice for rough work in rocky soil. Like the 2121 and 4321 Bed Shapers with the same shaper pan, 5" to 8" bed heights are also available.

10" Bed Height Shown

3361

- 50 PTO-HP rating
- Category-1 or 2 hitch
- Single 3" square toolbar
- Disk gangs adjust on 84" toolbar
- Four 22" disks on two gangs
- Shaper pan w/ adjustable 24" to 54" bed top
- Choose 5" to 10" bed height

5361

- 80 PTO-HP rating
- Category-2 hitch - quick hitch compatible
- Single 4" square toolbar
- Disk gangs adjust on 84" toolbar
- Four 22" disks on two gangs
- Shaper pan w/ adjustable 24" to 54" bed top
- Choose 5" to 12" bed height

Vineyard Special

5201V

Disk gangs are set-up on 5201V to throw soil toward vines. This features the same hitch as 5201 and is available with different toolbar widths to match your row system or a 4th toolbar (shown) for adjustable frame width. Attachments are available to loosen harder ground or heavier sod in front of gangs - please inquire. Ask about hydraulic on-the-go width adjustment.

Horsepower requirement

Disk Bedders with a shaper pan pushing soil pull a little harder, but still less than Bed Shapers with static furrowers. Minimum 30 PTO-HP for a 6" bed, 40 PTO-HP for an 8" bed, 50 PTO-HP for a 10" bed, 60 PTO-HP for a 12" bed.
