

Multi-Tool Kits

These attachment packages show basic ways to set-up different machines with the same toolbar. Mechanize on a budget or maximize investment if you question machinery used only one or two days a year. This is for mechanic-types that can trade money for time. Keep simple set-up diagrams and change-over time for most equipment tends to be under 30 minutes.

As you progress, invest in additional toolbars to set-up dedicated machines.

Part numbers are itemized on price list

25320-5
