

All-in-one bed shaping and plastic mulch application with conventional tillage/soil preparation

Additional attachments available:

- Drip tape applicator(s)
- Dry wheel puncher
- Fumigation knives & tank rack
- Fertilizer applicator

Combos offer large-farm efficiency with an all-in-one Bed Shaper and Mulch Layer. Form beds in one pass with immediate plastic mulch application. This emphasizes working soil deep before planting.

The Bed Shaper is fully adjustable to set bed width relative to mulch width and bed height. Adjustable mulch width accommodates narrower mulch rolls for smaller tractors or wider rolls for maximum weed control coverage.

Also use this equipment for most paper or woven materials - please inquire.

Models for all growers

1912-D "Junior"	Category-1	for 25-35 PTO HP tractors
2212-D	Category-1	for 35-45 PTO HP tractors
4612-D	Category-2	for 45-80 PTO HP tractors

3-row Bedder-Layer Combos also available

Horsepower requirement

Nearly any tractor with a Category-1 3-point hitch can form a 4" bed height. Smaller tractors may need front weight to lift a Combo. Minimum 30-35 PTO-HP for 6" beds. 50 PTO-HP Category-2 tractor for 8" bed height.
