

**MODEL 4333****MULCH LAYER**

**Heavy-duty frame | Category-2 hitch**

**Fully adjustable**

Model 4333 is built on a heavier toolbar frame with 2-1/2" square toolbars. 16" opening disks and covering disks. Rear gauge wheels are standard equipment for exceptional floatation. 4333 is for growers who want heavy iron for high-speed use on bigger tractors. Like Model 2333, front tillage shanks can be added to loosen soil ahead of opening disks.

Model 8133 is also available, featuring steel carriage rollers mounted on ball bearings, disks and gauge wheels on heavy-duty tapered bearing hubs.

- 2-1/2" square toolbars
- Adjustable 3 to 5-1/2-ft mulch width
- Wide frame for 6-ft mulch or row cover also available
- Options include drip tape applicator(s), dry wheel puncher, rear shields

*Equip with double roll carriage for non-stop operation on long rows*
