

Row cover / tunnel application

Plastic mulch application
on beds up to 12" high

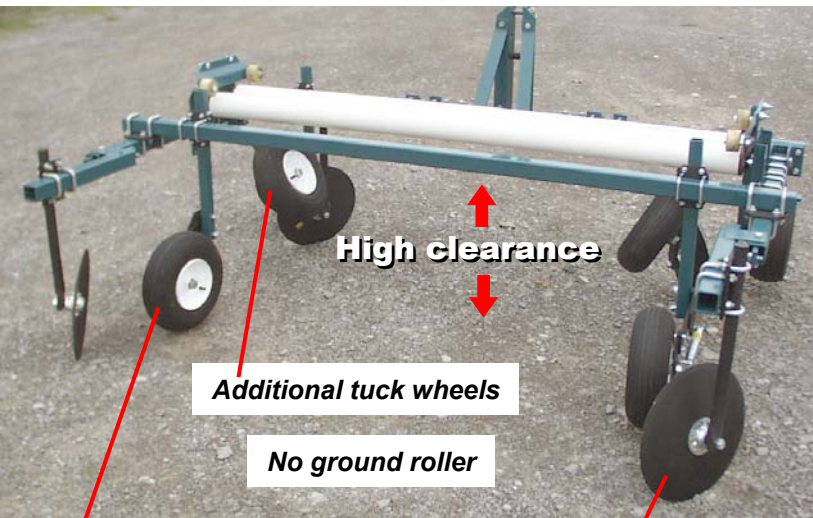

Up to 6-ft wide material

High-Clearance Layers feature a second set of tuck wheels to pull plastic over hand-set wire hoops or extra-high raised beds.

Crop protection practices vary widely. Besides row tunnels are floating row cover, hot pots and hoopouses. Each offers advantages and growers may use more than one solution.

10" raised beds

High clearance

Additional tuck wheels

No ground roller

Floating tuck wheels
on the ground

Easy-adjust covering disks have positive
depth control for consistent coverage

Tractor requirements

Row Cover Layers simply roll on loose seedbed soil, which requires little pulling power. Tractors wide and tall enough to straddle tunnels can also pull and lift it.

Simply set roll on carriage
rollers. High-clearance roll
carriage has adjustable width
- use different materials

Multi-purpose
Install a ground roller as
needed for conventional
mulch application

Also available - Narrow bed and mulch equipment scaled for hoopouses
Retrieval equipment to pull up row cover as fast as you put it down
