

Model 71

**Custom toolbars available to mount
planter units behind bed shapers**

**Custom toolbars available for
small-farm planter set-ups**

The original Model 71 planter unit, now manufactured by Yetter Mfg Co., is an economical, dependable and adaptable alternative to vacuum-type planters.

Many seed plates are available. The seed plate design is particularly suitable for coated seeds. Seed plates from Lincoln Ag Products are compatible.

The drive mechanism for each unit is self-contained, allowing easy row spacing set-up and avoiding complex and expensive drive drains. Mount on many toolbars.
