

Versatile

crop maintenance

Multi-toolbar frames are the backbone on many types of cultivators. Equip for one application or add attachments for more.

Full-width toolbars allow precise placement of attachments to match your row system and allow adjustment for different crops or crop growth. It's flexible in wet seasons or other adverse conditions. **Be creative in the art of mechanical cultivation.**

For raised-bed or flat-land applications

Precision cultivation

Furrows between raised beds are an ideal guidance system. Gauge wheels and furrow shanks track perfectly - better than anything electronic.

perfect a seedbed

Timeless know-how with a wide selection of attachments

Along with this generation's farm equipment, we also bring what our grandfathers knew in the field. Many of these attachments have been proven for decades, others are more recent and possibly trendy. Skillfully apply the right attachments for your crops and conditions. Detailed descriptions of attachments and applications follow.
