

Raised-Bed Row Crop Cultivation

Row Spiders and Cultivating Disks compliment many row crop set-ups with gentle but thorough cultivation up close to the row. Larger Spider Wheel Gangs work a broader bed top.

Precision Cultivation

Raised beds are an ideal guidance system. Furrow Wings keep Cultivators perfectly centered on bed rows.

4-bar toolbar frames provide more toolbar space for offset Knives and Sweeps to pass more residue or allow higher ground speeds.

Cultivation between plastic mulch rows

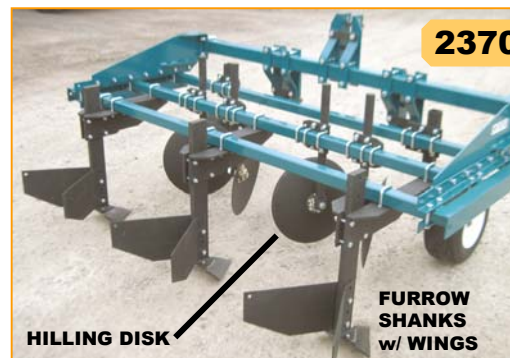

Blind Cultivation

Tine Weeders

have specialized applications for in-row weed control. Mount on Raised Bed Cultivators.
