Attachment Packages

For convenience, some Attachments for popular Cultivator set-ups are grouped into Attachment Packages and can be ordered with one Model Number. These Complete Models with an Attachment Package are described on Pages 11-3 or 11-4 and listed separately on the Price List. Items in Packages can still be itemized on Order, if preferred. The price is the same.

A full description of common Attachments begins on Page 11-6.

Feel free to contact Sales at Buckeye Tractor if you need any further assistance with specifications or applications.

Gauge Wheels

Depth Control

Beyond the ease to drop the Cultivator and go, Gauge Wheels provide depth control under the toolbar frame, which is fundamental for consistent working depth and consistent results with careful row crop work, particularly precision cultivation.

Cultivators without Gauge Wheels: Operators might do without for light or shallow tillage if the operator manipulates hitch controls. Any problems with equipment "gouging" or "hopping" or excessive soil fracture in the row or the inability of smaller tractor to control the Cultivator will only first be addressed by adding Gauge Wheels.

ADD to complete Cultivator

___668 Series	
Gauge Wheels, 16x650-8, L&R	
21668	-- for 2" square toolbar

Series 668 is an economical low-acreage wheel with ball bearings for 2000 Series Category-1 Models. Grease once a year and they'll last forever on a small farm.

___674 Series	
Gauge Wheels, 16x650-8, L&R	
21674	-- for 2" square toolbar
26674	-- for 2-1/2" square toolbar

Series 674 features conventional 4-bolt trailer hubs for heavy service or buyers who want the best. 668 and 674 have 16x650-8 (16" diameter) tires, a more compact size for this toolbar systems. Series 882 is the same as 674 but features 18x850-8 (18" diameter) tires for larger 4000 Series Cultivators or more floatation.

___882 Series	
Gauge Wheels, 18x850-8, L&R	
26882	-- for 2-1/2" square toolbar
