

5127-M

Model 5127-M is a basic heavy-duty lifter for about any mulch lifting work on Category-2 tractors up to 60 HP. Specs are similar to the 4437-M but built on a primary tillage toolbar system with 4" square toolbars.

- 60 PTO HP rating - for 45 to 60 HP tractors
- Adjustable for 4 to 6 ft mulch or row cover
- Category-2 hitch / quick-hitch compatible
- TWO 4" square toolbars
- Gauge wheels w/ 4-bolt trailer hubs
- 18" coulters w/ tapered bearing hubs
- 1-1/4 x 4 ripper shanks w/ shear-bolt

5337-M

Model 5337-M features a heavy-duty multi-purpose ripper-style toolbar for higher-HP tractors. The third toolbar adds more weight and offers more versatility for Multi-Tool Kits.

Super-duty 5537-M for tractors up to 125-HP is also available. Rip through the toughest compaction from wet conditions or heavy field traffic.

Multi-use toolbar

5337-M can also be your heavy toolbar for primary tillage. Use ripper shanks without lifter

sweeps for zone or full fracture. Install a bed lifter blade or disk gangs for primary bed shaping on 5127-M or 5337-M.

- 80 PTO HP rating - for 50 to 80 HP tractors
- Adjustable for 4 to 6 ft mulch or row cover
- Category-2 hitch / quick-hitch compatible
- THREE 4" square toolbars
- Gauge wheels w/ 4-bolt trailer hubs
- 18" coulters w/ tapered bearing hubs
- 1-1/4 x 4 ripper shanks w/ shear-bolt

Spring-cushion coulters are available for 5127-M and 5337-M. Automatic-reset ripper shanks are available for 5337-M. Note these special shanks are rarely needed in fields suitable for plastic mulch.

Set-up a 5-shank Chisel Plow on 5337-M or a 7-shank Chisel Plow on 5537-M for basic primary tillage.
