- 18" coulter diameter

- 1-1/4 x 4 ripper shanks
- Shear bolt protection
- Low-profile lifter sweeps
- Heave plates

**Heavy-duty for
up to 80 HP tractors**

3 toolbars offer more versatility for mulch or tape

5337 Models offer more versatility to set-up for plastic mulch or drip tape applications. Features include a heavier hitch for more-demanding mulch or tape removal. The 3rd toolbar allows placement of gauge wheels in front of coulters for narrow furrows or space to customize shank and coulter placement for drip tape.

In addition to the Multi-Tool Kits available for the 5127-M toolbar, this toolbar accommodates 7 chisel shanks or 3 ripper shanks. Ripper shanks can also be combined with disk gangs.

Bigger multi-tool possibilities

- Adjustable for 3 to 6-ft mulch width
- Equip for 1 or 2 lines of drip tape
- 4" square toolbars
- Category-2 hitch / quick hitch compatible
- 80 PTO HP rating / for 50-80 HP tractor
