

- 50 PTO-HP rating - for 35-50 HP tractors
- Category-1 or 2 (adjustable)
- 3" square toolbars
- Gauge wheels w/ 4-bolt trailer hubs

Model 3120 Chisel Plow puts 35 to 50 PTO-HP tractors to work for deeper primary tillage. This is the opportunity for small-farm or fresh-market farms to perform conventional tillage practices.

Special Clamp  
#30203-CM  
for front, center  
shank mounting

**3" square toolbars  
for 35-50 PTO-HP tractors**

**3 or 4 chisel shanks**

This toolbar is flexible to set-up shanks for general field work or zone tillage. 3 or 4 in-line shanks have wider spacing, so expect to double-back field passes for full-profile tillage. 4-shank offset spacing for heavier field residue is also possible with a special rear shank bracket.

### Spring cushion?

Spring-cushion is available for 3" square toolbars if you want to burn the cash. Otherwise, buried rocks can simply raise the toolbar. 35-50 HP tractors are very unlikely to bend a shank.

### SET-UP ADDITIONAL EQUIPMENT ON YOUR CHISEL PLOW TOOLBAR WITH MULTI-TOOL KITS

**AFFORDABLE MECHANIZATION ON A SMALL-FARM SCALE**
