

Buckeye Tractor has your drip irrigation solution. A choice of applicator shanks provides tape placement anywhere from 1" to 18" deep. Install multiple shanks and roll supports with automatic brakes on 4x4 or 6x6 toolbars, depending on depth and power needed to pull. Our modular design is most versatile for nearly any conventional or custom set-up.

50 HP Shank
for application below plow level

max 18" depth

25 HP Shank
for application below seedbed

max 12" depth

Sub-Surface Shoe
