

Simple field equipment for HOMESTEADS or HOBBY FARMS

Transition from hand work to basic row-crop principles

Sub-compact

Versatile, multi-purpose components

The Garden Series is a line of field equipment scaled for hobby farms or personal gardening. Often with a plot less than an acre and with a landscaping tractor at hand, such growers may be realizing they are planting more than they can take care of by hand. We invite you to read the entire GARDEN EQUIPMENT PRIMER to review facts, ideas and product descriptions and how all works together to make the smallest tractor-mechanized farm effort work. It will answer many basic questions.
