

## Mulch Mastery

**State-of-the-art  
design**

**Models for all growers**

**Use on flat land  
or existing raised beds**

**For many types of materials**

**Expect perfection.** We put as much care into building Mulch Layers as you do growing your crop. All models are fully adjustable for a variety of application practices and proper placement of material edges, with or without raised beds.

Beyond the use of black plastic mulch for basic weed control and soil temperature and moisture management, also apply biodegradable mulch, colored mulch or row cover. Paper and woven materials are also useable with the same equipment.
