

use on bare ground

- 2006-PB** 1-6 wheels for 2121 - 2331
- 2006-PB** 1-6 wheels for 4531
- 1706-PB** 1-4 wheels for 1721

Precision planting for precision cultivation

A significant benefit of puncher wheels behind bed shapers is precision planting. Rows are perfectly centered on beds to allow close cultivation. Puncher frames for Bed Shapers are wider and heavier to accommodate more wheels.

A typical set-up for garlic or onions

- 2006-PD** 1-2 wheels for 3361 - 5361

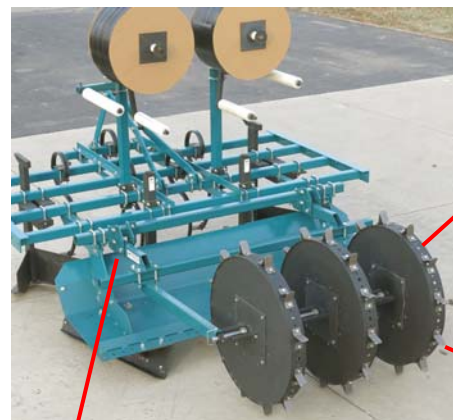

Versatile wheels for all growers

Several wheel sizes are available with multiple hole patterns for many plant spacing choices. We were the first to offer bolt-on punches to change plant spacing or punch sizes on the same wheel.

Call for installations on older Mulch Layer or Bed Shaper models. Also call for custom set-ups.

Tractor requirement

Consider tractor weight and 3-point hitch. The added length to a bed shaper or mulch layer has a multiplying effect on needed hitch lift capacity. Also, front ballast may be needed on smaller tractors.

Equipment for the 1-2-3 row system

Wheels easy to add or remove. Move wheels on shaft to adjust row spacing

Many punch sizes available

Hinge point allows frame to float
