

1706-PA

Installation on Bed Shaper

Greatly simplifies planting

1706-PB

Installation on Mulch Layer

Junior

model for compact tractors

Any for-profit farm benefits with puncher wheels to mark rows and plant locations, often combined with mulch layers or bed shapers. If used without plastic mulch on raised beds, rows are centered for precision cultivation, even if planted on foot. **See page 17 for wheel specs**

- **Single or multiple multi-purpose wheels**
- **Changeable plant spacing**
- **Changeable plant punches**
- **Adjustable row spacing to match your system**
